

Overview

The purpose of this notification is to communicate that Xilinx is transitioning to pin gate mold (PGM) in plastic ball grid array FG(G) and BG(G) packages. Xilinx's Assembly Suppliers are transitioning by the end of Jan, 2014. This notification applies to all XC Commercial (C) and Industrial (I) grade FPGA products.

Description

Xilinx's Assembly Suppliers are transitioning from corner gate mold to pin gate mold for FG(G) and BG(G) packages. Suppliers are converting mature PBGA devices to PGM for improved productivity. PGM process is designed with the JEDEC compliant larger mold cap still meeting Xilinx's outer package dimensions.

In addition:

1. Minor Change in the Marking Template: PGM ejector pin will move to the center of the package while CGM ejector pin remains at the pin 1 indicator location. The new marking template with PGM & CGM will be applied to all of BG(G)256, FG(G)320, FG(G)400, FG(G)456, FG(G)484 and FG(G)676 devices packages as shown in [Figure 1](#).
2. Shipping Tray: change in the shipping tray for the 23mmx23mm PBGA packages. The new 23mmx23mm PBGA Daewon tray matrices are designed to be compatible with the current shipping trays, and will have the same X/Y tray dimensions. However, the new 23mmx23mm Daewon trays are non-stackable with current tray due to a slip lock feature. The new trays have larger cavity pocket at bottom of cell cavity that's designed for CGM and PGM (larger mold body). Xilinx recommends that customers not stack or mix the new Daewon trays with the current shipping trays. Please reference [Table 2](#) and [Figure 2](#) for clarification.

These changes have no effect on form, fit, function or reliability.

Products Affected

This change affects all standard and specification control document (SCD) XC Commercial (C) and Industrial (I) grade devices listed in [Table 1](#).

Table 1: Affected FPGA devices family using PGM

Key Dates and Ordering Information

Xilinx will begin to cross ship both PGM and CGM packages with the new marking template by Feb 1st, 2014.

Qualification Data

Supplier's have previously qualified PGM packages and have been in production since 2009. Xilinx will perform additional qualification using Xilinx device/packages listed in [Table 3](#). Xilinx qualification data will be available per the schedule in [Table 4](#).

Table 3: Qualification Plan

Device	Package	Reliability Test	SS
XC6SLX100T	FGG676	PC3+TCB1000x	25 x 3lots
XC2VP40	FGG676	PC3+TCB1000x	25 x 3lots
XC3S5000	FGG676	PC3+TCB1000x	25 x 3lots

Table 4: Qualification Schedule

Package Type	Mold cavity type	Estimated Conditional Qualification Schedule	Estimated Production Release Schedule
Wire Bond FG(G) Package	Pin Gate mold	Jun 30 th , 2013	Feb 1 st , 2014

Response

No response is required. For additional information or questions, please contact [Xilinx Technical Support](#).

Important Notice: Xilinx Customer Notifications (XCNs, XDNs, and Quality Alerts) can be delivered via e-mail alerts sent by the Support website (<http://www.xilinx.com/support>). Register today and personalize your "Documentation and Design Advisory Alerts" area to include Customer Notifications. Xilinx Support provides many benefits, including the ability to receive alerts for new and updated information about specific products, as well as alerts for other publications such as data sheets, errata, application notes, etc. For information on how to sign up, refer to Answer Record 18683: <http://www.xilinx.com/support/answers/18683.htm>.

Revision History

The following table shows the revision history for this document:

Date	Version	Description of Revisions
12/17/12	1.0	Initial release.
01/25/13	1.0.1	Minor update to add "PGM" to shipping tray under the description section.
